

# MYCANOE SOLO 2 is a lightweight, affordable, and easy-to-use folding canoe for a single person.

When folded, MYCANOE SOLO 2 becomes a box 1m or so in length and when unfolded, it becomes an elegantly streamlined canoe 2.9m in length. It has the upgraded performance of the original MYCANOE SOLO but a downgraded price, making it a more accessible canoe that gives you more for your buck.

The canoe can be assembled or disassembled within 2-3 minutes and has excellent portability and usability because it's been lightened to less than 9kg. It's also especially advantageous against the wind because it's been designed to be low in height from stem to stern. If you have a pair of kayak paddles, it can even instantly become an open deck kayak.

Worried because you're a beginner? SOLO 2 has great speed but also great stability, making it easy for beginners to get used to and be able to ride right away. If you want to make your outdoor activities more diverse and fun, choose MYCANOE SOLO 2 now.

## STABILITY

The sense of stability with which even the beginners could easily adapt themselves in using it by widening the width of canoe

## DURABILITY

A poly-propylene plastic living hinge function with which you'd be able to fold and unfold it 20,000 times

## PERFORMANCE

Assembly and disassembly within 3 min, the sense of speed that resembles that of a wooden canoe, and turning force

## LIGHT

Realization of lightening with parts optimization

## DESIGN

Application of classic Canadian canoe + modern design

## SMART BOX

It can be stored inside the trunk of a sedan, and the canoe's floorplate can be utilized as the package case.

MYCANOE
